From the Mission Director, National Health Mission,
Ref.No.509/P9/SHS/2019, Dated:11.02.2019.

ORDER:

In letter read above, the Mission Director, National Health Mission has stated that the Tamil Nadu has been the Role Model for Various states in implementing a robust and efficient health care setup. The State is also known for introducing various pro people scheme and implementing them successfully. Following the tremendous success in reducing mortality and morbidity, such schemes have been later adopted by other states as well the centre. Use of Tamil Nadu Medical Service Corporation in Drug Procurement, CEmONC Centres, Cadaver Organ Transplant Programme, SNCU for few such schemes. Efficient and Effective Public Health System has reduced infectious diseases and now the predominant cause of mortality and morbidity is Non Communicable Diseases.

2. The Mission Director, National Health Mission has also stated that the State of Tamil Nadu is the seventh most populous and highly urbanized in the country with 14,257 km of National and State highways. In 2016, the State accounted for 17,311 deaths due to Road Traffic Injury (RTI) which is 12% higher when compared to 2015. In the country the State constitutes to a share of 15.9% injuries and 10.7% deaths (MoRTH, 2015). As per the Global Disease Burden report 2017, the Disability Adjusted Life Year's (DALY's) lost due to Injuries is 13.5% (Unintentional injuries, Self harm and Interpersonal Violence and Transport Injuries). Road Traffic Accident has been an overwhelming Public health challenge of the era disproportionately killing and maiming many in the economically productive age group. It results in serious physical, mental and psycho-social impairment, bringing huge catastrophic expense to the family, crashing down its peace and security. Because of the increasing incidence of Accidents, Infarctions, Cerebro Vascular Accidents (Stroke), Accidental and Deliberate (Self Harm) Poisoning and Burns along with increased prevalence of those with residual morbidity due to these conditions, it is imperative to pay more and focused attention to these conditions. Hence there is need of a dedicated programme aimed at addressing these conditions at all (Primordial, Primary, Secondary, Tertiary and Quarternary) levels of health care. Hence Tamil Nadu Accident and Emergency Care Initiative (TAEI) has been conceptualised and created.

3. The Mission Director, National Health Mission has also stated that the Concept of ED is new in the Government hospitals and Tamil Nadu Emergency Care Initiative aims to establish one such in order to decongest the ER (prevent unnecessary overloading and delays in being seen by specialist). The following 3 Hospitals have been selected based on the case load handled in Accident & Emergency ward.

Name of Hospital	Case load handled from October 2017 - April 2018
Government Rajaji Hospital, Madurai Medical College, Madurai.	17136
Rajiv Gandhi Government General Hospital, Madras Medical College, Chennai.	10610
Mahatma Gandhi Memorial Government Hospital, KAP Viswanathan Government Medical College, Trichy.	6776
