Health and Family Welfare (EAP II-2) Department

G.O(Ms) No.90

Dated :07.03.2019
Vilambi, Maasi - 23
Thiruvalluvar Aandu 2050

Read:

From the Mission Director, National Health Mission, Ref.No.510 / P9 /SHS/ 2019,, Dated:11.02.2019.

**ORDER:**

The Mission Director, National Health Mission in his letter read above has stated that the State of Tamil Nadu is the seventh most populous and highly urbanized in the country with 14,257 km of National and State highways. In 2016, the State accounted for 17,311 deaths due to Road Traffic Injury (RTI) which is 12% higher when compared to 2015. In the country, the State constitutes to a share of 15.9% injuries and 10.7% deaths (MoRTH, 2015). As per the Global Disease Burden report 2017, the Disability Adjusted Life Year's (DALY's) lost due to Injuries is 13.5 % (Unintentional injuries, Self harm and Interpersonal Violence and Transport Injuries). Road Traffic Accident has been an overwhelming Public health challenge of the era disproportionately killing and maiming many in the economically productive age group. It results in serious physical, mental and psycho-social impairment, bringing huge catastrophic expense to the family, crashing down its peace and security.

3. The Mission Director, National Health Mission has also stated that Other Non Communicable diseases are also increasing in incidence due effective management of communicable diseases as well as due to the changing socio economic profile of the state. Thirty years ago, the predominant care needed in a Hospital Out Patient / Emergency Department was tackling Communicable Diseases. Today, there is a paradigm shift and the predominant demand is to tackle Non Communicable diseases. Because of the increasing incidence of Accidents, Infarctions, Cerebro Vascular Accidents (Stroke), Accidental and Deliberate (Self Harm) Poisoning and Burns along with increased prevalence of those with residual morbidity due to these conditions, it is imperative to pay more and focused attention to these conditions. Hence there is need of a dedicated programme aimed at addressing these conditions at all (Primordial, Primary, Secondary, Tertiary and Quarternary) levels of health care. Hence Tamil Nadu Accident and Emergency Care Initiative (TAEI) has been conceptualised and created.

4. The Mission Director, National Health Mission has also stated that the State Planning Commission have recommended the Proposal "Tamil Nadu

Accident and Emergency Care Initiative – Provision of Portable CT scan and Transport Ventilator for Emergency Room” under Tamil Nadu Innovation Initiatives funds for Rs.796.00 Lakhs for improving the Emergency Management Services in Rajiv Gandhi Government General Hospital and Tamil Nadu Accident and Emergency Care Initiative Centres in 12 Hospitals in the State.

5. The Mission Director, National Health Mission has further stated that the Entire Cost is for Procurement and Installation of the Equipment. The Equipment will be installed in the existing hospitals building. There is no need for new Buildings or Additional Human Resources for these equipment. Recurrent Costs, if any, shall be met from the Chief Minister Comprehensive Health Insurance Schemes funds of the respected institutions.

6. The Mission Director, National Health Mission has requested to issue necessary orders in this regard.

7. The Government after careful examination have decided to accept the proposal of the Mission Director, National Health Mission and issue the following orders:-
